WHAT IS CYRUS FINANCE

A decentralized protocol for managing yield strategies.

All processes are performed by smart contracts, without intermediaries.

Combines proprietary strategies and proven third-party DeFi solutions.

Fully transparent architecture and open source.

THE PROBLEM

WE ARE SOLVING

DeFi is complex and requires experience.

Manual position management is labor-intensive.

Users are forced to switch between multiple protocols.

High entry threshold and often lack of transparency.

OUR SOLUTION

Cyrus Finance creates a single protocol that:

Automates staking and strategy management.

Simplifies access to complex DeFi mechanics.

Ensures the openness of all operations: everything is on-chain.

It makes it easy to manage assets through a simple interface.

KEY ADVANTAGES

On-chain logic: no hidden processes or intermediaries.

Transparency and openness – smart contracts are available for verification.

Flexibility of strategies: quick selection, switching, risk management.

Automation – profits and processes without manual actions.

Versatility – suitable for both beginners and experts.

HOW IT WORKS

**Connecting a Web3
wallet.**

01.

**Choosing a strategy for
goals and risk profile.**

02.

**The funds are sent to the
protocol's smart
contracts.**

03.

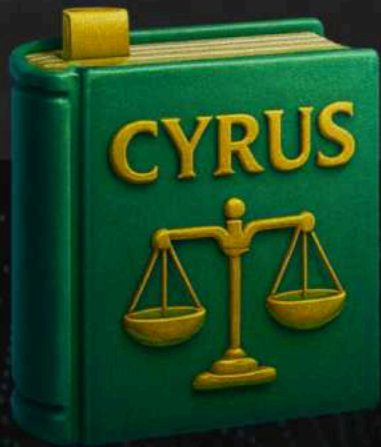

**Automatic staking and
strategy operation.**

04.

**The ability to compound, add funds,
withdraw, and manage a position.**

05.

STRATEGIES

**Cyrus author's
strategies.**

**Strategies for third-
party DeFi protocols.**

**A balance between
profitability, risk and
accessibility.**

**Optimized
distribution and
compound
mechanics.**

SAFETY

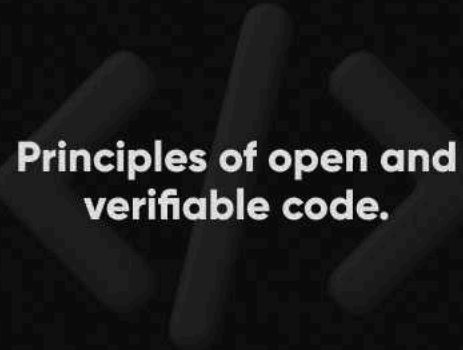

Architecture based on smart contracts.

The ability to verify any action on the blockchain.

There are no intermediaries, no custodial control.

Principles of open and verifiable code.

CERTIK

Your funds are fully protected.

All of our smart contracts have been audited by CertiK, a trusted global leader in blockchain security.

[Check](#)

THE INCENTIVE MODEL

17/7%

when compounding 7%

The commission is charged solely on the profits earned at the time of withdrawal, which completely eliminates any conflict of interest between the protocol and users.

Cyrus Finance is based on the principle of coordinating the interests of the protocol and its participants.

The platform generates revenue only when the participants make a profit. The protocol does not earn on deposited funds and does not monetize entry or participation.

Cyrus Finance is interested in the long-term sustainability of the protocol, the continuous growth of participant revenues and the expansion of the ecosystem in the coming years, rather than in short-term advertising.

WHAT IS AVAILABLE **AT LAUNCH**

A basic set of strategies

for staking and income optimization
in pancakeswap.

Full automation of interactions.

**Transparent commissions
and on-chain operations.**

**User-friendly interface +
connection of wallets.**

THE VISION

Creating a scalable DeFi ecosystem.

Expanding the set of strategies and integrations.

Building a culture of transparency and trust around DeFi.

Make profitable strategies available to every Web3 user.

FINANCE

ROADMAP

cyrusfinace.xyz

2026

UTILITY & MARKET EXPANSION

Q2-Q3 2026 – NFT Game Launch

Cyrus Legends (P2E)

- NFT-based strategy game
- Liquidity-backed NFT cards with yield modifiers
- On-chain rewards linked to vault performance
- Seasonal tournaments & leaderboard rewards
- NFT staking & in-game boosts

Q3-Q4 2026 – NFT Positions Marketplace

- Launch of NFT Positions Market
- Trading active LP NFT positions
- Advanced position analytics (APR, fees, IL risk)
- Auctions & fractionalized LP NFTs (beta)

Q4 2026 – Multi-Chain & Optimization

- Multi-chain expansion
- Advanced rebalancing engine
- Institutional analytics dashboard
- Risk-tiered vault strateg

2027

TOKENIZATION & GOVERNANCE LAYER

Q1 2027 – Token Architecture

- CYS token announcement
- Deflationary tokenomics + fee redistribution
- Airdrop mechanics (LPs & NFT holders)
- Security audits

Q2 2027 – TGE & Staking

- Token Generation Event
- Staking platform launch
- Liquidity bootstrap campaign
- Governance module preview

Q3 2027 – Listings & Integrations

CEX listings:

- OKX
- Bybit
- KuCoin

Protocol expansion:

- Lending protocol integrations
- Cross-DEX routing
- LP NFTs as collateral (experimental)

Q4 2027 – DAO & Global Expansion

Additional listings:

- Kraken
- Bitfinex
- HTX (Huobi)
- DAO framework launch
- On-chain governance proposals
- Ecosystem grants program

2028

DERIVATIVES & ADVANCED DEFI

H1 2028

- Cyrus Perpetual DEX announcement
- Hybrid liquidity engine design
- Structured yield vaults
- Volatility-based strategies

H2 2028

- Prediction market module
- Institutional API suite
- Cross-chain liquidity routing engine
- Advanced derivatives infrastructure

2029

FINANCIAL INFRASTRUCTURE EXPANSION

H1 2029

- Native Lending Protocol
- LP NFT collateralization
- Variable & fixed rate markets

H2 2029

- Algorithmic stable asset (CUSD)
- Delta-neutral yield framework
- RWA platform announcement
- Institutional liquidity partnerships

2030

CYRUS CHAIN & GLOBAL INFRASTRUCTURE LAYER

H1 2030 – Cyrus Chain Announcement

- Proprietary high-performance blockchain
- Optimized for perpetual trading, lending & high-frequency execution
- Ultra-low latency matching engine
- Parallelized execution environment
- App-specific architecture for DeFi primitives

Purpose-built infrastructure layer similar in execution philosophy to Hyperliquid.

H2 2030 – Mainnet & Ecosystem Activation

- Cyrus Chain mainnet launch
- Native Perpetual DEX deployment
- Native Lending Market deployment
- Stable asset full integration
- Cross-chain liquidity bridges
- Full DAO treasury migration
- Multi-billion TVL target

PARTNER PROGRAM

How to unlock levels:

To unlock each level, two conditions must be met.:

Active Deposit: Maintain an active deposit for the required minimum amount.

01.

Team Turnover: Achieve the required team turnover, which is calculated as the sum of all deposits made by your partners.

02.

Invite friends and grow your earnings together. Every time your referral harvest or compound rewards, you receive a percentage of their generated income.

Our 20-level affiliate program, allows you to earn across multiple tiers of your network, unlocking scalable passive income as your community expands.

[Watch the Gitbook](#)

You will receive rewards solely from the income generated by your partners.
